

Homework 1: Introduction to R

1. Read [Workflow:basics](#) in [R for Data Science 2e](#)
2. Install R <https://www.r-project.org/> Choose a CRAN mirror near you and follow the on-screen instructions. If you run into problems, please come to open hours or contact your instructor or TA.
3. Install RStudio <https://www.rstudio.com/products/rstudio/download/#download>
Note: R must be installed first.
4. Install tidyverse using command `install(tidyverse)` or `install.packages("tidyverse")`
5. Download the file "[HW1_R_Basics.R](#)"
6. [Download HW1_R_Basics.R](#)
7. ". Rename the file with your name added (i.e. HW1_R_Basics_Sami.R".
8. Open the file in RStudio and work through the exercises. We will start this as a group in class. (HINT: use [this site](#) for help)
9. Save and submit your file. If you tried something (or many things) that didn't work, submit what you tried! Absolutely feel free to ask for help, but part of the goal of this exercise is to explore the environment yourself and build your problem solving skills. You will get credit for making the attempt. Your TA's will be available during Discussion to help get your started.
